

Product Stewardship Policy

As an Australian furniture manufacturer, we take responsibility for the environmental impacts of the Lifecycle of our products including the ultimate disposal of waste and packaging.

We are proud to be one of the only Australian office furniture manufacturers to be able to offer our own Commercial Product Stewardship Program focussed on recycling and takeback program for the products we provide. Our promise is to ensure our products are recycled under this program and won't end up in landfill.

Once recovered, the product will either be recycled back through our supply chain in materials such as melamine or fully recycled using one of our accredited recycling agents (ARA).

Furthermore, focussed on the impact of our purchasing on the environment, we focus on minimising our impact to the environment. Through procuring timber that has renewable and recycled content for our office furniture

The potential value of this can be realized in two ways:

1. The energy replacement value based on the amount of fossil fuel (coal, gas and diesel) displaced by the use of PEF; and
2. The carbon and renewable energy benefits that may in turn be accrued via:
 - Carbon value from avoided fossil fuel use
 - Benefits from avoided emissions from landfill
 - Renewable Energy Certificates

All these processes are carried for AMS Furniture in Australia; no product is shipped overseas for recycling or reprocessing.
